# Let's Get Mining – Setup Instructions

## Download Applications

### Power Automate Process Mining

1. [Power Automate Process Mining](#) desktop app
2. After the installer file downloads, select **Install** when prompted to run the installer.

Allow a few minutes for the installer to download and install the application files.

3. When the welcome screen opens, select the preferred application language and select **Next step** to start the guided configuration wizard.
4. In the next step, accept the terms of use and confirm the choice of telemetry data collection, and then select **Next step**.
5. By default, the installation process will store process mining data in a new **Process Mining** folder in the **Documents** folder in your OneDrive. Change the location if necessary, and then select **Next step**.

If the selected folder has been used before, Power Automate Process Mining lets you choose whether you want to use the content of the folder (for example, data and settings from a previous installation), or cleanup the folder. Select **Use** or **Cleanup** to specify your choice. To go back and change the storage location, select **Cancel**.

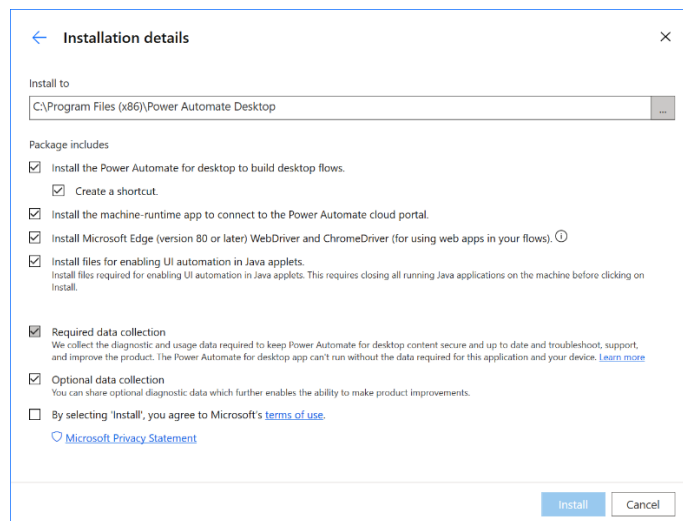

6. Select **Apply and Mine!** to finish the wizard.
7. Sign in to Power Automate Process Mining with your work credentials or those given to you by the proctor.

### Power Automate Desktop

1. [Download the Power Automate installer](#). Save the file to your desktop or Downloads folder.
2. Run the **Setup.Microsoft.PowerAutomate.exe** file.
3. Follow the instructions in the **Power Automate for desktop setup** installer.

4. Make your selections for each feature:

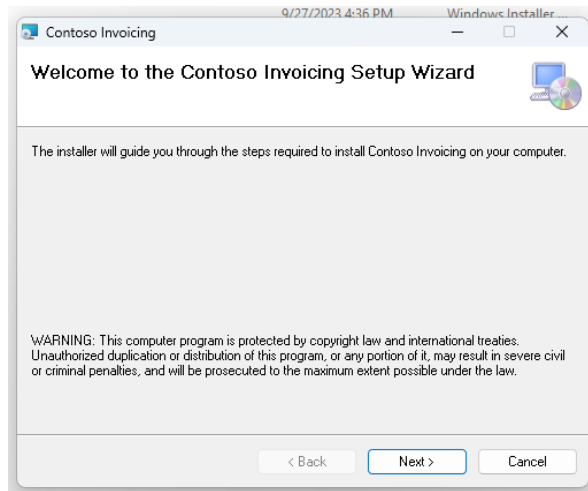

- **Power Automate for desktop** is the app you use to build, edit, and run desktop flows.
- **Machine-runtime app** allows you to connect your machine to the Power Automate cloud and harness the full power of robotic process automation (RPA). [Learn more about machine management.](#)
- Install required files for UI automation in Java applets. Close all Java-related processes before you install these files.
- Clear **Optional data collection** if you don't want to send usage data to Microsoft to help us troubleshoot issues with Power Automate. [Learn more about data collection.](#)

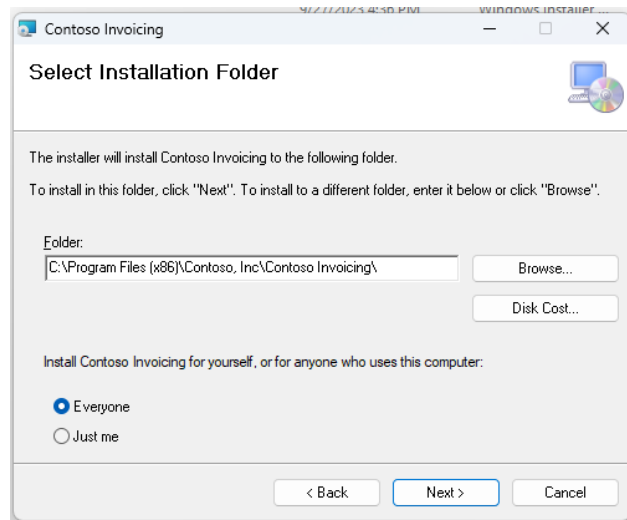

5. Select the check box to agree to the terms of use, and then select **Install**.

## Contoso Invoicing App

1. Download the [Contoso Invoicing App](#).
2. Open the downloaded **.msi** file from where downloads are saved on your device.
3. Select **Next** in the Setup Wizard.

4. Select the appropriate installation folder and then select **Next**.

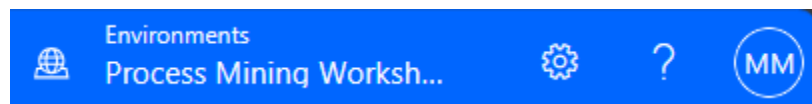

5. Select **Next**.
6. You may be asked to grant user access control.
7. Select **Close** after installation is complete.

# Log into Power Automate and Import Solution

1. Go to Power Automate via this link - <https://make.powerautomate.com/>.

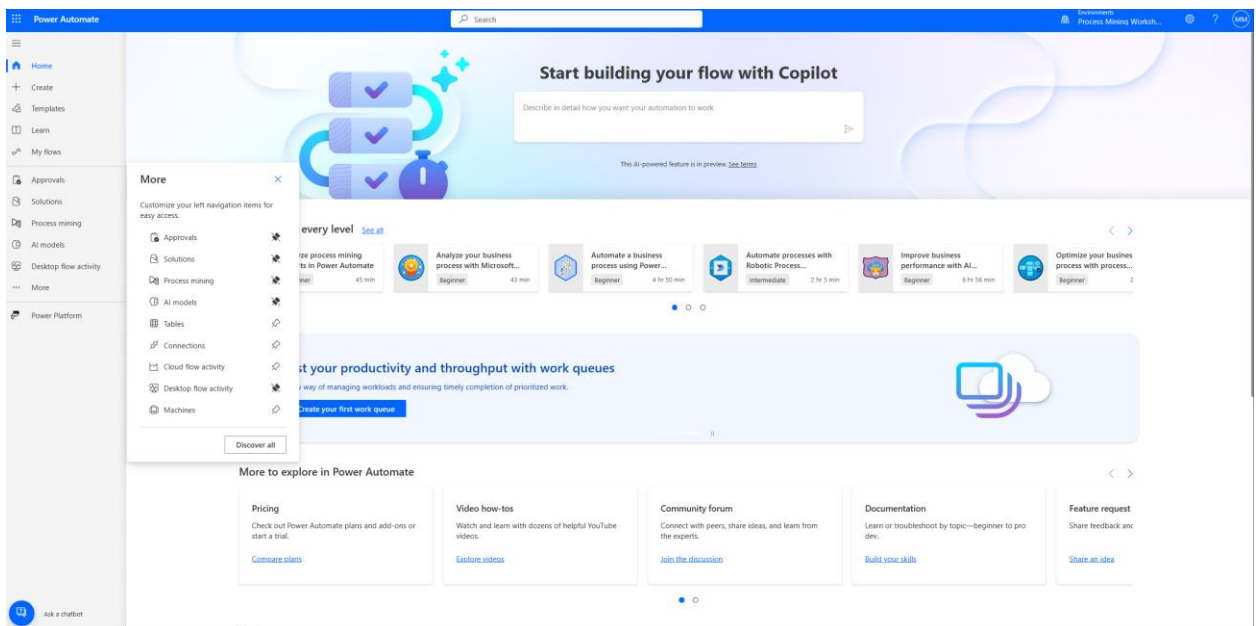

(If you are using credentials given to you by a proctor you may want to use and incognito tab).

2. Log in using your work/personal account or using the credentials given to you by a proctor.
3. If you were provided credentials - navigate to the **Process Mining Workshop** environment in the top left navigation. If not, use the environment of your choice.

## Import task mining solution

1. In the left navigation in the Power Automate web portal select **Solutions**. This may be in the **More** section as well.

- Copy the below zip file and paste it in an accessible location on your device.

RPAinadayProcessAdvisor\_1\_0\_0\_2.zip

Download the solution archive from here - [https://github.com/jpad5/mppc23-processmining/blob/main/assets/pre-reqs/RPAinadayProcessAdvisor\\_1\\_0\\_0\\_2.zip](https://github.com/jpad5/mppc23-processmining/blob/main/assets/pre-reqs/RPAinadayProcessAdvisor_1_0_0_2.zip)

- From the Solutions screen select **Import solution** from the command bar.
- In the right hand panel that expands select **Browse** and select the zip file from the location in which you saved it.
- Select **Next** and select **Import**.
- After a couple minutes, you should see a confirmation message that your solution has been imported successfully and a new solution called **RPA in a day – Process Advisor** has been installed.

Try pipelines for effortless imports

Use pipelines to simplify and automate the deployment process in your organization. Pipelines is a feature of Managed Environments. [Learn more](#)

Next Cancel

It may take a few minutes for the import to successfully import.

## **Congratulations! Now you have completed all the pre-requisites for this workshop. You are now ready for the labs using Power Automate Process Mining.**
